G.
gate 5

Gate 5 Design Gallery is born in 2013 from the experience and professionalism of Céline Marcato, founder of the Gallery. After having collaborated 5 years with Galleria O. she decided to open her own space in Monte Carlo.

Gate 5 is specialized in Historical Italian Design; design is an integral part of Italy's history.
The research in historical design covers the three periods of Italian Modern Design hitsory; the 30-50s, years that establish the fundamentals of Italian design, the 30-50s called Modernism and 70s post-Modernist period of Radical Design. In parallel Gate 5 develop contemporary projects with designers, in collaboration with curators from the contemporary art world, on main thematics. Designers are invited on-site to create and develop exclusive collections together with the gallery and curators. Our clientele comes from the Contemporary Art world and our goal is to make them understand that the harmony between art & design is essential. That is why Gate 5 is blurring the classic ways of a Design Gallery to develop projects by organising shows in private houses, promoting pieces at international fairs and collaborating closely with renowned architects and interior design studios or with other art gallery. Gate 5 works between interiors and site-specific design providing consultancy and assistance in building contemporary interiors.
We believe that Contemporary Art & Design needs to be in interaction in order to create harmony.

The gallery offices are located in Monaco, strategic location that attracts international collectors from all around the world. We also have a space in Rome to welcome and exhibit our collection.

We also promote Italian Modern Design through educational program leads by Curators in order to teach people history of Design. As an example, we are working with Marie Claude Beaud, director of the Monaco Museum of Modern Art, formerly director of Fondation Cartier, Luxembourg Museum; she is also on the board of Louvre Abu Dhabi and other prestigious institutions.

Today a buyer needs to be surprised and seduced by stories; we tell stories and insert Design in the context of a cultural frame.
